

Office Professionals:

Sharper, more vibrant documents.

Professional Printers:

Higher quality printing on all printing devices.

Personal Consumers:

Brighter colors and faster drying time.

IT Managers:

Compatibility on all printing equipment.

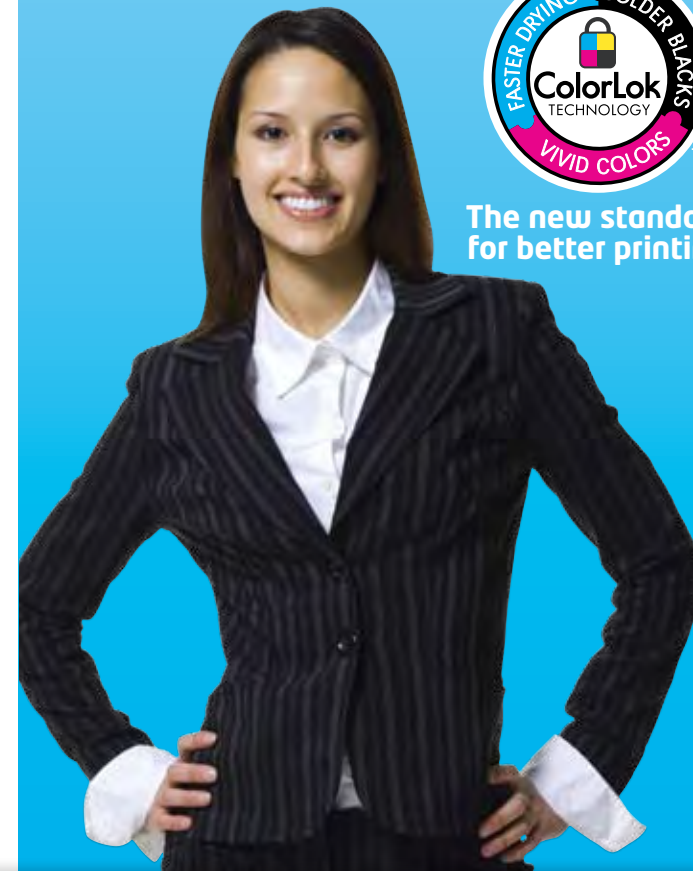

The new standard for better printing.

Why is Elise happy?

She discovered the key to better paper and better printing.

The new standard for better printing.

Who does ColorLok® Technology make happy?

Better paper. It's not your ordinary paper.

Whether you're printing in the office or at home – on inkjet, laser printers or copiers – ColorLok® paper is the key to successful printing. This exciting new scientific advancement in the formulation of paper results in:

- More vivid colors and bolder blacks.
- Faster drying time.
- Long life for laser printers.
- Optimal results on all printers and copiers.

One technology for all papers, all machines.

Better printing. A recipe for success.

The science behind ColorLok Technology is real and revolutionary. It is based on a class of paper additives that interacts with pigment ink to keep the colorant near the paper surface for rich, vivid print quality and enables highly absorptive papers for faster drying.

In addition, papers with ColorLok Technology meet a range of specifications that apply to inkjet and laser printing. That means in an office setting with many different types of machines, ColorLok papers will provide consistent and reliable printing regardless of which machine is used, helping laser printers live a long, productive life.

Ordinary paper is out. ColorLok paper is in.

ColorLok papers deliver superior results with more vivid colors, bolder blacks, faster drying time and high performance. Whether in the office or at home, people have discovered the key to better printing with ColorLok papers. Professionals appreciate the high quality results of sharper, more vibrant documents. Consumers love the brighter colors and faster drying time. And everyone is happy with the long life of their printers and achieving optimal results on any type of printing equipment.

Once you've used ColorLok papers, no ordinary paper will make you happy.
